

Cloud Computing Practical

Experiment: Create Hello World Web Application using AWS S3

Aim:

To create and host a simple Hello World web application using AWS S3 service.

Requirements: AWS Account Internet Connection Web Browser HTML File **Theory:**

Amazon S3 (Simple Storage Service) is a cloud storage service provided by AWS. It can also host static websites like HTML, CSS and JavaScript applications.

Detailed Steps:

Step 1: Login to AWS Console

1. Open browser.
2. Go to <https://aws.amazon.com/>
3. Click on Sign In to Console.
4. Enter AWS username and password.
5. Login successfully.

Step 2: Open Amazon S3 Service

1. Search S3 in AWS search bar.
2. Click Amazon S3.

Step 3: Create S3 Bucket

1. Click Create Bucket.
2. Enter bucket name.
3. Select region.
4. Uncheck Block all public access.
5. Confirm warning.
6. Click Create Bucket.

Step 4: Create HTML File

Create file named index.html and add below code.

```
<!DOCTYPE html>
<html>
<head>
  <title>Hello World App</title>
</head>
<body>

  <h1>Hello World from AWS S3</h1>

</body>
</html>
```

Step 5: Upload HTML File

1. Open created bucket.
2. Click Upload.
3. Add index.html file.
4. Click Upload.

Step 6: Enable Static Website Hosting

1. Open bucket Properties tab.
2. Scroll to Static Website Hosting.
3. Click Edit.
4. Enable Static Website Hosting.
5. Enter index.html as Index Document.
6. Save changes.

Step 7: Give Public Permission

1. Open uploaded index.html file.
2. Go to Permissions.
3. Enable Public Read Access.
4. Save changes.

Step 8: Open Website

1. Copy generated website endpoint URL.
2. Open URL in browser.

Output:

Hello World from AWS S3

Result:

Successfully created and hosted Hello World web application using AWS S3 Static Website Hosting.

Viva Questions:

1. What is AWS?

AWS is a cloud computing platform provided by Amazon.

2. What is Amazon S3?

Amazon S3 is cloud storage service used to store files and host static websites.

3. What is Static Website Hosting?

It allows hosting HTML/CSS/JavaScript websites using S3 bucket.

4. What is a Bucket?

Bucket is a storage container in Amazon S3.
